

**IN THE CLAIMS:**

Please amend the following claims:

1. (Amended) A method for displaying a map in a navigation system including the steps of:

- a. providing a palette having a plurality of shades of each of a plurality of colors;
- b. displaying each of a plurality of pixels at one of the plurality of colors;
- c. displaying the map including a plurality of road lines; and
- d. anti-aliasing the road lines utilizing the plurality of colors.

2. (Amended) The method of claim 1 further including the steps of:

- e. [providing] utilizing the [a] plurality of shades [of each of the colors] in the palette to anti-alias the road lines; and
- f. displaying the road lines as a first color of the plurality of colors against a background of a second color of the plurality of colors.

**REMARKS**

The Examiner's detailed comments regarding this application and the prior art references are greatly appreciated. Applicant agrees with the Examiner's comments and has amended claim 1 to include the patentable feature, namely that the palette includes the plurality of shades. Applicant agrees that this would require that the palette includes the plurality of shades at the outset. All of the claims should now be allowable.
